

# Alwan PrintStandardizer

**ALWAN PRINTSTANDARDIZER ENABLES YOU TO IMPROVE YOUR PRESS CONSISTENCY, COLOR ACCURACY AND PRODUCTIVITY**

## BENEFITS

### IMPROVE QUALITY

#### Communication in the workflow

Alwan PrintStandardizer identifies customers' expectations (aims and tolerances) of incoming jobs for accurate quality control on the press.

#### Consistent and repeatable colors

Alwan PrintStandardizer allows you to achieve consistent and unequalled color quality on CMYK, Spot and Multicolor printing processes. The software also helps you maintain color matching throughout the print run and from job to job.

#### Quality insurance

Alwan's local and remote reporting enables you to track your jobs, your devices and your pressroom over time.

### IMPROVE PRODUCTIVITY AND EFFICIENCY

#### Standards conformance

Alwan PrintStandardizer supports International Standards, Specifications (G7® & ISO 12647 & ISO 15339/CGATS TR016) and any custom printing standard. Calibration to standards enables you to quickly match customers' proof and honors their color expectations.

#### Time-saving

Alwan PrintStandardizer is a smart, automated and standardized calibration solution that identifies, corrects and maintains printer dot gain curves and gray balance eliminating manual systems and human errors. Easy to use in production, no specific color bar or calibration print sessions needed.

#### Cost Saving

Alwan PrintStandardizer helps you eliminate file or plate remakes and paper waste trying to achieve the right colors. Your savings are direct and quantifiable.
