Scan to CMYK, LCH, and RGB Color

In ScanWizard Pro with full palette features for device-independent (LCH) and device-dependent (CMYK, RGB) are for a mature and professional users to operate ArtixScan 3200XL quickly.

Auto Dynamic Range

An attempt to get the perfect scanned image, ScanWizard Pro can optimize the scanned transparency by comparing Dynamic Minimum and Dynamic Maximum.

Before

After

Auto White/Black Dot Correction

Corrected by Auto White/Black Dot Correction, scanned transparency or picture can be more adorable by brightening the white color and darkening the black color.

Before

After

Noise Reducing Function

Using Multiple Sampling can clarify the textures and reduce noise on the image so that the scanned images can get pristine and near-origin quality, which usually used by printing manufactory.

Before

After

Auto Color Restoration

ColorRescue function can restore the faded color on the old pictures or films. Users can archive the old or discolor pictures anytime.

Neon Function for Negative Film

ScanWizard Pro has the ISO profile of each film brand. Users can base on the information of film manufactory, model, ISO, and so on to set the function and get the near-origin and genuine scanned image.
